

Nova Command

Controlling a software working environment remotely through messaging.

Operational code requiring qualification · Filing not verified

Buyer need

Operators need to control agents through messaging without duplicate execution.

Available evidence

A messaging gateway and a draft dossier are available.

What remains to be demonstrated

Authorisation review, incident recovery and repeatability in customer environments.

Nova Command

Market and alternatives

Agent runtimes and durable execution platforms are already available.

Potential buyers

Independent operators and small studios

Next fundable milestone

Validate a full scenario on an isolated machine with a security review.

Decision criterion

Proceed with a supervised installation service. No patent acquisition is assumed.

Targeted, non-exhaustive research. Commercial conclusions are hypotheses. These sources establish no acquisition interest in DreamNova.

Validation budget

Nova Command

\$6,841 – \$17,105

30 to 60 days, initial feasibility

Planning assumptions, not quotations or valuations. The bounds are two spending scenarios, not a statistical confidence interval. Further investment depends on milestone results.

Engineering

Low scenario	\$4,105
High scenario	\$10,263

Computing, hardware or external laboratory

Low scenario	\$1,710
High scenario	\$4,276

Preliminary IP review

Low scenario	\$1,026
High scenario	\$2,566

Planning assumption, not a quotation or an asset valuation. Includes preliminary IP review; excludes drafting and filing, a full freedom-to-operate assessment, tax, industrialisation and regulatory studies. Deduct any services that overlap with a future filing quotation.

Public sources

[LangChain — agent runtime. April 2026](#)

[Temporal — durable execution](#)

Planning amounts are expressed in US dollars using the ECB reference rates dated 25 September 2026. These are indicative conversions, not bank transaction rates or supplier quotations.
