

Protection budget

Useful protection depends on claims, prior art, ownership and territories. A provisional application is not an examined, granted patent.

Preparation and first filing

1 family/families	\$5,702 – \$13,684
5 family/families	\$28,508 – \$68,418
24 family/families	\$136,836 – \$328,406

24 documentary families do not mean 24 independent applications. Internal planning estimate: prior-art and claim scoping plus drafting and first filing. Deduct any preliminary IP review already included in the validation budget. VAT, litigation and technical validation are excluded.

Chart: amounts per family.

Preparation and first filing

Extension around month 12

Selected territories, years 2–5

Planning assumptions, not quotations or valuations. The bounds are two spending scenarios, not a statistical confidence interval. Further investment depends on milestone results.

Official fee reference points

Foreign fees are translated indicatively into this version's currency using ECB rates dated 25 September 2026. The payable amount is the patent office tariff in its own currency. Professional fees, renewal fees, translation and possible surcharges are excluded.

US provisional: micro / small / large	\$65 / \$130 / \$325
US utility: filing, search and examination	\$400 / \$730 / \$2,000
France: filing, search and grant	\$725
Europe: filing and search / subtotal through grant	\$1,973 / \$6,380
PCT: international filing component only	\$1,606
Israel: national filing, confirm 2026 payable amount	\$792

Before filing or assigning rights

Match receipts to the actual filed text; verify inventors and assignments; document disclosures; compare claims with prior art; examine freedom to operate separately; agree on territories and deadlines with qualified patent counsel.

1

Technical evidence

2

Claims review

3

Buyer pilot

4

Licence or assignment

Proposed decision path; no stage is assumed to be complete.

Scope and verification

24 families have received targeted research. No complete patentability or freedom-to-operate opinion has been established for these 24 families in this project; this does not mean the inventions are invalid. 50 relevant NotebookLM notebooks were identified; eight additional projects still need reconciliation with this inventory. Both accounts were accessed; exhaustive review of their sources remains outstanding. No filing is presented as officially confirmed.

24 documentary families do not mean 24 independent applications. Internal planning estimate: prior-art and claim scoping plus drafting and first filing. Deduct any preliminary IP review already included in the validation budget. VAT, litigation and technical validation are excluded.
